

Chief Executive Officer

Background: G-ray Médical is a development-stage medical imaging company, based in Neuchâtel/Hauterive (Switzerland). The company is based on a unique proprietary X-ray particle detector, the latanium™ architecture, based on a set of patented disruptive technologies. The development of the first medical detector, based on a Germanium absorber, is on-going and the first detectors will be available at the end of 2019: this development will set the stage for a new era in the field of low-energy X-ray medical imaging. The initial medical application addressed by the company is mammography. The company has a strategic partnership with its sister company, G-ray Nanobonding, which is pursuing the development of additional new materials technologies which will enable G-ray Médical to address new applications beyond mammography, including interventional cardiology, dental, fluoroscopy... The company strategy is to partner with established system integrators.

Position Summary The CEO reports to the Board of G-ray Switzerland SA, and manages all business, commercial, marketing and technology aspects of the company, including product specifications, market requirements, costing, medical registration. As such he/she is also responsible for driving external meetings with medical groups, industry partners, technology suppliers and actively support investors relations.
